STRATEQ'S 4th GENERATION CLOUD ENTERPRISE HEALTHCARE SOLUTION

With more than 15 years of industry know-how, Strateq launches its 4th Generation Cloud Enterprise Healthcare Solution - 37 DEGREES, which symbolizing a normal, healthy body temperature.

37 DEGREES is a comprehensive healthcare solution platform developed using the latest, proven open standard technologies that provides benefit of high security, reliability, stability and low cost. With Service Oriented Architecture (SOA), 37 DEGREES is neatly designed into modules and components that cover all

aspects of hospital operations including clinicals, financials and administrative. Coupled with many handy features like favourite list, checklist, work list and picklist to improve user experience hence improve productivity. The built-in role-based access control enhances security and reliefs users from information and functionality overload.

37 DEGREES runs on all major web browsers and tablet devices (iOS, Android, Windows) that increase mobility of care providers, hence provide better patient care.

THE BENEFITS

FLEXIBILITY

Highly customizable with workflow, role-based and Dynamic Form engines.

SCALABILITY

Scalable from single hospital to distributed multi-site hospitals.

MOBILITY

Support all major web browsers and tablet devices (iOS, Android, Windows).

INTEROPERABILITY

Fully HL7 and web services.

WHAT SETS US APART?

37 DEGREES is an outcome of co-design with clinicians, nurses, pharmacist and hospital staff from more than 10 hospitals through many workshops, prototype cycles, review, and field test. It is designed by hospital professionals for hospitals. With a successful track record of implementing and supporting more than 21 public and private hospitals in past 15 years by our 130 workforce, Strateq will continue to excel as the No. 1 player in Malaysia healthcare industry and targeting to be a regional and international player in near future.
